

## Course List 2027 Entry

**This document sets out the courses at each UAT-UK institution that require applicants to take one of our admissions tests.**

Candidates must check the relevant course pages on the website of the institution(s) to which they are applying before booking a test. It is your responsibility to ensure you meet the entrance requirements for your UCAS application. For many of the listed courses, the relevant admissions test is **compulsory**, and if you do not register and take the test, it may invalidate your application. Although every effort is made to ensure this list is complete and accurate, UAT-UK cannot be held responsible where a test is not booked in accordance with the relevant entrance requirements.

### Important Information About ESAT Module Selection

If you are applying to two or more courses that require the ESAT, and one of them has a free choice of modules, your module selection must be dictated by the courses that have compulsory modules listed. If you do not register to sit compulsory modules, your application to that course may be invalid.

**Please note that module selection cannot be changed or added after booking.** Where this is required, candidates will be asked to cancel their test and re-book. Any re-booking is subject to test centre availability, and it is not guaranteed that your preferred time or test location will still be available.
